TRAITS OF HORSES.

An Expert Declares That the Equino Family is Not Subject to Insanity. A gentleman who has made a study of horses and their characteristics for rears and who is the owner of a numer of fine animals, was shown an item that has been going the rounds of the press about a horse becoming insane.
"I do not believe there is any such

thing as insanity among horses," he said. "A borse may become wild and anmanageable from pain, such as the toothache, or because of cruel and brutal treatment or fright, but it is only temporary affection. But I will not leny that many horses are natural deny that many horses are honorofools. I have in fact seen many such on which there was no dependence, and a characteristic of which is the taking up of a mouthful of hay and tossing it about, making frequently no headway in eating. Such horses show no affec-tion, and a stranger can drive them as readily as one who has handled them for years, which is not the case with an intelligent horse. One thing that makes a horse nervous is these fancy curb bits, which hurt a horse considerably, and I attribute a great deal of this so-called viciousness to these contrivances. No, sir; I do not even be ieve in natural viciousness in a horse To ill-treatment this is all due. Takes high-strung, nervous horse, and it does ot require much ill-treatment to make him vicious. I have seen horses and owned them which would be perfectly centle in harness and in the stable, but the moment they would see me take up a stick or a whip would at once seem to change their dispositions and try to jump upon me and otherwise do me harm. Out West this summer I came across a black horse which had killed three men, and which worked six mates to death. He was worked twelve years to death. He was worked twelve years day and night on a stage coach. He would trample both men and his mates to death the momen

they came near him. But he was ill-treated, brutally treated, all the time. Why, every time they put a har-ness on him they would keep him goad-ed with a pitchfork so that he trembled with fear all the time. It was quite a sight to see him harpessed. After the harness was snapped about him a heavy rope was tied about his neck and then would be clubbed over the head and backed out of the stall. Then the rope would be thrown over a beam and the men would take the bridle and club him with it on the head so as to stun him before they could get it on. He was a large, powerful animal, and fine looking. Yet to-day that horse is as gentle as a kitten. Why so? Be-cause he passed into other hands from

whom he received kind treatment, that

vas all he needed. "I have a light sorrel horse named Rowdy, which I have owned about two years. He was very high strung and a notorious runaway when I got him. The man who sold him to me confessed that no impression could be made on the horse's mouth. I began with gentle treatment and letting him know I was his master, and drove him with a straight bit. At the start he kicked straight out the traces. Now he is sub-dued and gentle, and the moment 1 speak to him he obeys and will come everywhere to me at the sound of my voice. He has a trait that causes much amusement. We allow him to run in pasture with a mate. Rowdy was always a great fence-jumper, but his mate was not on the start. When together North Side, - - Moran, Kansas Rowdy would leap a fence, and then seeing his mate decline to follow, would at first coax by jumping over it several times back and forth, and at last, seeing this would not succeed, would begin bit ing the other one and pushing it with

his nose until be compelled it to jump. "While West I noticed that frequent ly horses are guided the same a oxen, without reins, and that it is very easy to teach them to obey in this way. It is like everything else about a horse-let him have confidence in his master and h will do any thing. I saw an odd instance of a balky horse out there. It was in Michigan, and he was attached to a light buggy. The horse was very large, and would weigh 1,700 to 1,800 pounds. They were on a level, and after going about eighty rods the horse stopped short and would not budge. He was beaten, knocked and whipped but without avail. Then a yoke of cattle was brought up and chained to the horse's neck. That horse was dragged half a mile by the cattle, and then was as stubborn as at first. He was finally left alone, and, after standing seven hours, started up all right of his own accord. The trouble is that when a horse gets balky people lose their tempers, and this only makes matters worse. The only sure remedy for a balky horse is to blindfold him by bandaging his eyes. I never knew this to fail, as it seems to take away the animal's attention from the subject over which he is stubborn."—N. Y. Mail and

-The invention of the modern form of the piano dates back to about 1700. The spinet, of rectangular shape, which we manage to call square, was called a virginal. It is frequently stated that it was done to compliment Queen Elizaeth, but this can not be true, as it is found mentioned among the musical instruments of King Henry VIII. Itis more likely that it was so named because it was intended to be played by young ladies. It was essentially a

A Walking Skeleton

A Walking Skeleton.

Mr. E. Springer, of Mcchanicsburg,
Pa., writes: "I was afflicted with lung
fever and absess on lungs, and reduced to a walking skeleton. Got a
free trial bottle of Dr. King's New
Discovery for Consumption, which did
me so much good that I bought a dollar bottle. After using three bottles,
found myself once more a mau, completely restored to health, with a hearty
appetite and a gaininflesh of 40 pounds.
Call at Goodhue & Evans' drug atore
and get a free trial bottle of this certain cure for all lung diseases. Large
bottles, \$1.00.

W. O. Tuggle, LaGrange, Ga., writing about Darbys prophylactic Finid, says: "It is a priceless jewel as a disinfectant and deodorizer. My Wife states for the benefit of young mothers that it is a valuable adjunct to the nursery." It is equally so to parents travelling with children. Not only is the Fluid nvaluable as a deodorizer, but a few should drops added to the water in baithing will remove all eruptions of the skin, chaing etc., and greatly refresh and soothr.

A school-boy asked to define the worl' 'sob," whispered out: "It means using profine words, but say, as sure when a feller don't mean to cry and it bursts on 'itself."

Do not emphasize your language by main profine words, but say, as sure as St. Patrick's Pills will physic there is nothing more detain.

ANOTHER SUDDEN DEATH

Hardly a week passes without the mention by the newspapers of sudden deaths, and
of late the alarming frequency of the statement that death was caused by rheumatism
or neuralgia of the heart cannot fail to have
been noticed. In all probability many deaths
attributed to heart disease are caused by
these terrible diseases, which are far more
dangerous than is generally considered. Is
there any positive cure? The best answer
to such a question is given by those who have
been cured by the use of Athlophorus.

Long Pine, Neb., Aug. 11th, 1886.

I suffered for years with neuralgia in my head, neck and face, and have spent, I know, over \$100 in trying to find some medicine to relieve me, and found only temporary relief in anything I tried until I saw an advertisement of Athlophoros. It gave relief at once, and after using one bottle and a half I found lasting relief. It helped and cured me where all other remedies failed. I have recommended it to several of my friends with like good results. I have not had a return of the disease since taking the Athlophoros over two years ago.

Mrs. M. A. Morrord.

Altoona, Jowa.

years ago. Mrs. M. A. Morford.
Athlophoros is giving unparalleled satisfaction in this locality as a sure cure for rheumatism. J. Jaques, a farmer near freemwood P. O., was cured of scalate rheumatism after having been for three months unable to walk without a crutch. J. A. Ogden of this place half for years been froubled with rheumatism, often times unable to work. He never found a permanent cure until he tried Athlophoros. Shipped two lottles by express as a present to a brother in Nebraska.

L. O. SHAFFER, Druggist.

Professor Wiggins' Prediction.

Professor Wiggins' Prediction.

(St. Joseph Gazett.)

Of the earthqurke in Southern and Central America September 29, happily has not come to pass and it is hoped never will. His prediction being based merely on theories, it proved not to be reliable. This, however, should not induce the public to doubt facts, such as are acknowledged by thousands who have used Phostphatic Lemon Rye, a positive cure for dyspensia and a nerve tonic which never fails to fulfill its mission. It is a blessing to any household, and to be had at all drug stores.

Dr. S. B. Houtts, M. D., St. Louis, Mo.; says: I have examined a sample bottle of Phosphatic Lemon Rye, and can testify to its sustaining qualities. In proportions, added to water, it will make a very pleasant, refreshing summer drink, having a tendency to repress perspiration. The preparation has the same quantity of phosporic acid, per dose, contained in Horsford's Acid Phosphate, and can be used for the same purpose.

This quite likely that some one will ask you the difference between Jerome Park and the natives of the Fiji Islands. If so, you can answer that one is a race course and the other a coarse race.—

Shoc and Leather Reporter.

—"Ain't it time you paid me that five dollars?" asked a farmer of his neighbor. "Tain't due," was the reply. "But you promised to pay me when you got back few New York." "Well I ban's to much in its praise.

Is the most dangerous and destructive of all contagious diseases; in fact lve of all contagious diseases; in fact, diarrhoes, choiers morbus and stomach disorders are greatly modified forms of this disease. During this month it is unsafe to be without Begg's Diarrhoes Balsam which acts so successfully in all summer complaints. It is harmless and pleasant to administer. Price 35 ally in cents.
